

Eyelash Growth Serums

Fast Facts

- They encourage and promote eyelash growth.
- They do this by extending the telogen (hair growth) phase.
- The serum is applied to the base of the lashes with a brush. When used on a daily basis, an increase in thickness, length, and a darker color to the lashes will appear.
- Growth is typically noticed after about a month of use.
- My experience is that each formula/brand stops working after about 9 months of continued use. I advise rotating brands.

RECOMMENDATIONS:

Babe Lash Essential Lash Serum

LUXROS Eyelash Growth Serum

Revitalash Cosmetics Advanced Eyelash Conditioner

All-Natural Option:

Cold Pressed Castor Oil (this works for many)
